PATROL WAGON DYNAMITED; EIGHT MEN ARE INJURED; MAY CALL OFF STRIKE

Philadelphia, Pa., March 24.—While returning from a riot call in the northern section of the city today a patrol wagon was badly damaged by dynamite, which was exploded under the vehicle. Six policemen, the driver and a sergeant, were thrown to the street and badly cut and bruised. It is believed the dynamite was placed on the car track by strike sympathizers for the purpose of damaging a street car and the patrol wagon only figured in the explosion accidentally. It is announced a general meeting of union men will be held Sunday to consider the advisability of calling off the general strike.

ENGLISH HOUSE OF LORDS RENOUNCES HEREDITARY RIGHTS TO MAKE LAWS

London, England, March 24.—By a vote of 175 to 17, the house of lords has renounced the hereditary right to legislate, which has been the cardinal element of the British upper house for centuries. The occasion of the fateful decision was Lord Rosebery's third resolution dealing with the reform of the house.

The house had agreed that reform and reconstitution was necessary. The complementary resolution which was passed by the lords was "that a necessary preliminary to such reform and reconstitution is acceptance of the principle that possession of a peerage should no longer of itself give the right to sit and vote in the house of lords."

It is significant that fewer than 200 of the 615 members of the house of lords shared in the fatal decision. Many of the absentees were reluctant to sanction the extinction of the hereditary principle. Nevertheless they so far recognized its expediency as not to oppose it. Not a few, indeed, of the majority who supported the resolution would have retained their hereditary right but for recognition of that expediency guided their votes. The resolution might have been carried unanimously but for the resolute pugnacity of two tenacious old fighters, the earl of Halsbury and the earl of Wemyss, the latter of whom has been actively identified for many years with volunteer soldiering and with the national rifle association, and who is still virile despite his 92 years, while the earl of Halsbury is so young.

MADE EL PASO THE COMMERCIAL CENTER

H. K. Bernard Urges Cooperation Among Business Men of El Paso.

"The Commercial Spirit of El Paso and Elsewhere," was the subject briefly but ably discussed at the noon luncheon today of the chamber of commerce by H. K. Bernard, manager of the International Electric Supply company. Mr. Bernard, although a young man, has traveled extensively, and is well acquainted with the business conditions over the United States. A spirit of cooperation was strongly urged by Mr. Bernard, the absence of which, he stated, was one of the serious drawbacks to the commercial progress of the city. He deplored the fact that often salesmen from El Paso houses, in approaching out of town customers, advised them "that my house is the only one in El Paso that can buy in carload lots." This advice, the speaker stated, would indicate that the city's commercial interests are small.

Buy in El Paso. The idea of buying supplies elsewhere, when they can be secured in El Paso, was also discouraged by Mr. Bernard, who stated that the eastern markets make serious inroads on the trade that rightfully belongs to El Paso. In speaking of conditions elsewhere, Mr. Bernard referred to Paris as the millinery center of the world, and London as the home of the English cloth. The prestige attained by those cities as commercial centers was stated to be due to the cooperation of the merchants.

"Why not El Paso as the commercial center of the country?" he asked his audience, which numbered 45 business men of the city. "All that has to be done is to cultivate a spirit of cooperation. 'In unison there is strength.'" Mr. Bernard also urged that the members of the chamber of commerce attend the regular meetings of the directors, and following the speech, D. M. Payne, president, who presided, announced the next meeting of the directors would be held Friday night. All were asked to attend.

FIRE IN CAFETERIA AND ELECTRIC STORE
Considerable Damage Done on Stanton Street by Flames.

Fire originating in the cafeteria conducted by the state police, south of the corner of St. Louis and North Stanton streets, gutted this store and damaged the stock of the El Paso Electric Supply company adjoining, at 9 o'clock Wednesday night, entailing a loss of between \$1000 and \$2000 to the buildings and the fixtures of both stores.

The fire is believed to have been the result of an overheated stove in which fire had been left burning when the fireman left his place of business about 8 o'clock.

All of the fixtures in the cafeteria were destroyed as well as the foodstuffs on hand, and the flames broke through the frame partition into the electrical supply store which was separated from the restaurant only by a thin board partition. Here the dry batteries on the shelves were rendered useless by the heat and water, handsome shades were tumbled to the floor by the streams of water turned in and considerable damage was done.

The building, a brick front with adobe sides, has wooden partitions separating the two stores. The building is owned by Joshua S. Reynolds.

Bronco Busters and Cowboys Have Taken Juarez

For the next three days Juarez will be turned over to the cowboys, bronco busters and steer riders for the big tournament to be held at Cowboy Park on Friday, Saturday and Sunday. A large crowd turned out this morning to see the carload of wild Mexican steers unloaded and driven to Cowboy Park by Tom Greer and his boys in genuine western style of 25 years ago. Several of the big fellows with galls on them that would have made Mand S. in her palest days, green with envy, struck their stride and got away from the bunch, and oh, my, how the boys did go after them. Gee, it was fun. It took three boys over an hour to get them and after putting them in the corral it cost something like two pesos gold each to fill the cravings of those three hungry punchers at a down town chuck house. Oh, gentle reader, you who have read all the great stories of western ranch life by such writers as Owen Wister, B. M. Bowers and others, you have admired, can now see the real life that stirred the great pens and brushes of such writers and painters. The management guarantees the public true western sport of high order, and everything will be done to preserve the high reputation that Mr. Greer has established in his past contests at Cowboy Park. The contests will start at 2 p. m. sharp each day. Street cars run direct to the gate from Little Plaza. Come and bring your friends. You won't regret it. Tickets on sale in El Paso at A. E. Ryan & Co., Geo. C. Ryan & Co., Ford theater box office, Orndorff hotel, Primm's Cigar store, Ward's pharmacy, Lobby Cigar Co., and Happy Hour theater box office.

INSURANCE RATE IN EL PASO MAY BE INCREASED CONSIDERABLY

El Paso Insurance and Business Men Expect It to Be High, But Advance Reasons as to Why El Paso Should Have a Low One—State Board Now Fixes the Rate.

Key rates are being prepared and announced by the state rating board as a basis upon which to fix fire insurance rates for the cities of Texas. The key rate for San Antonio, as announced by the state board is to be 52 cents, Dallas, Fort Worth and other Texas cities have been announced also and are equally high. El Paso insurance men say.

The key rate for El Paso, upon which all insurance in this city will be based, will be announced within five weeks, according to C. B. Roulet, actuary acting for the insurance companies operating in the state.

El Paso's basic rate is expected to be high. This in spite of the fact that it is the most modern constructed city in the state, has an efficient paid fire department, and also in spite of the fact that El Paso's fire loss is much less than one-half the total amount of premiums paid for insurance.

Local Fire Loss.
Last year, according to the report of the chief of the fire department the total loss by fire amounted to but \$85,799.40. There were 237 alarms, of which 22 were false alarms, and there were but four really costly fires during the year. The value of the buildings and contents which were saved amounted to \$381,320.60. The total insurance on these buildings over the losses amounted to \$381,320.60.

Large Annual Payment.
It is estimated that there is \$250,000 paid annually to the insurance companies by El Paso for protection. This estimate was based upon the valuation of the property within the city and the percentage of insurance carried by property owners. Local insurance men claim this is too high. One agent says \$200,000 is a high estimate while another says it is even less.

These premiums were paid upon the old basis rate by which each building is considered separately as a risk and the actuary of the insurance company fixes the rate for that particular building without any basic or key rate to guide him.

Fixed by State Board.
The key rate is prepared by the state rating board, acting upon information furnished it by the insurance companies through its actuary, C. B. Roulet. The actuary in turn is supplied with a large amount of data which is collected and compiled by the national board of fire underwriters. Upon this data a key rate is fixed by the board for each city in the state. Should the rate be considered too high, the interested parties have the right of appeal to the board, a hearing will be arranged at which the various points in dispute will be considered. In fixing the key rate everything pertaining to the fire risks and fire protection is taken into consideration. The actuary had a force of men here last fall testing water mains and inspecting the fire department, and getting an estimate of the number of inflammable buildings within the fire limits. In addition to this investigation the National Board of Underwriters also made a supplementary inspection of the various factors entering into fire protection and fire risks, the benefit of which will be given the insurance companies operating within the state through C. B. Roulet, the actuary representing the companies.

Allowance of Credits.
When this key rate is submitted and accepted, all insurance rates are fixed upon it as the basis. Credits are allowed for improvements in fire fighting, deficiencies are counted for improper fire protection, overhead wires and other conditions which tend to increase the fire risk. El Paso, with its brick buildings, paid fire department and paved streets, should be given a key rate much below that which has been fixed for the other cities of the state. When the representatives of the state board and the underwriters were here they spoke favorably of the fire fighting department, and also in general of the local conditions. These things are all being considered by the state rating board at the present time.
